## INITIAL PLAN

The journey of an interior design project begins with our team of skilled designers conducting an initial site visit. During this visit, the team meticulously inspects the space, assessing critical factors such as natural light, wall conditions, and existing structural elements that may influence the design. Following this comprehensive site evaluation, the designers proceed to develop an initial interior plan. This plan is crafted using precise measurements taken on-site and outlines the spatial layout, including square meter calculations and utility spaces. This initial blueprint serves as the foundational step in creating a cohesive and functional interior design tailored to the client's needs.

**ISRA**

## CONCEPT MOODBOARD

Creating a design project is a complex process of creativity and engineering that unfolds in several key stages. In the first stage of our collaboration, we will conduct a debriefing to understand your tastes, needs, style, and desires. Based on a set of questions we provide, we will create a profile that encompasses the design style to be chosen and your real needs regarding the spaces.

We will then create and present a visual design concept tailored to your needs and preferences, from which you can understand the stylistic direction and ambiance we will incorporate into the design project. Essentially, through this board called the MOODBOARD CONCEPT, we will define the design style and the atmosphere that will later be presented in the renderings, and most importantly, in reality.

## SAMPLE MOODBOARD

Our materials and colors moodboard is a captivating and detailed visual representation, designed to give you a concrete and inspirational preview of the final look of your design project. Created in a 3D format, this moodboard offers an immersive experience that allows you to explore and interact with textures, finishes, and shades in an engaging way.

Utilizing advanced 3D technology, we present a diverse range of materials proposed for use in your project, including wood, stone, glass, metal, and many others. Each material is depicted in detail, enabling you to appreciate its texture, color, and appearance under various lighting conditions and viewing angles.

## PLAN VERSIONS TO BE APPROVED

Before embarking on the more complex phases of the design journey, our team meets with the client, either in person or virtually. During this meeting, we present the project, which includes the moodboard concept, sample moodboards, and at least two versions of furniture placement plans for larger spaces. These initial ideas are showcased to give a comprehensive overview of the design vision. Following the presentation, we engage in a discussion with the client to address any changes or additions, ensuring the design aligns perfectly with their expectations and preferences.

# RENDERERS

At ISRA Design, our commitment is to bring your dreams to life by providing a complete and captivating design experience. After defining the concept and selecting your preferred arrangement from our detailed plans, the next step is to elevate the location into a 3D environment.

Our team of design experts uses the latest technologies and advanced software to create an accurate and realistic digital representation of your space. We painstakingly apply each detail, including lighting, furniture, finishes, textures, and colors, to offer you a comprehensive preview of the final look of the project.

Using the materials and colors presented in our moodboard, we bring your vision to life in a virtual environment, ensuring that each element fits perfectly and creates the desired atmosphere. Every space is then rendered from multiple angles, in 4K format, to provide you with a detailed and delightful image of every aspect of the project.

With this meticulous approach and attention to detail, we guarantee that you will have a remarkable design experience and that the final result will far exceed any expectations. At ISRA Design, we are dedicated to providing you not only with impeccable design but also with a memorable journey towards transforming your space into a dream destination.

## TECHNICAL PLANS

Technical plans consolidate the 3D design. Based on the original layout, these plans are created to ensure workers understand the construction, any necessary demolition, and other critical aspects, such as:

- Initial plan
- Wall demolition / construction plan
- Furniture plan
- Drainage and water supply plan
- Floor plan
- Detailed ceiling plan
- Electrical plan
- Lighting fixtures plan
- Finishes plan
- Elevations
- Bespoke furniture plan

After your project is accepted, our team will focus on creating all the necessary documents for implementation. These include detailed 2D plans, elevations, stereotomies, electrical, and plumbing plans, with each aspect treated with the utmost attention to detail. Once completed, these documents are sent to our trusted partners to obtain price quotes for materials and equipment. We provide you with detailed offers for all project elements, including labor and finishing costs.

# BUDGET V2

After you have reviewed and approved the offers, the project is ready for implementation. Our team will guide you through each stage of the implementation process, ensuring that every detail is executed according to our high standards. At ISRA Design, we are committed to providing you not only with exceptional design but also with a smooth and hassle-free implementation experience. With our dedicated team and trusted partners, we are ready to transform your vision into reality.

# REALISTIC PHOTOGRAPHY

Realistic photography entails enlisting the expertise of a professional interior photographer who breathes life into our projects based on our renders. This is where our motto, "When reality looks better than the renders," originates, as the final outcome proves to be more captivating and immersive. It marks the genuine "WOW" moment, where reality exceeds expectations.
